Bug Report

Title : Admin change his pass but login with previous password yet.

Sevierity : Major

Priority : High

Steps to reproduce:

1. Log in as an admin
2. Navigate to homepage than click to profile name
3. Clicked on change password and change the password
4. Then logout from the page and go to log in page
5. Enter the old password for testing but still navigate to the home page.

Expected behavior: Show me alert box or notify that your password is wrong or something.

Actual behavior : Navigate to the home page with previous password.

Click on the link

Final Summary

Product quality of the OrangeHRM website appears stable and functionally reliable, with core HR features such as login, employee management, and leave tracking working as expected. The user interface is clean and structured, though minor usability improvements and performance optimizations can increase the user experience.

I would recommend releasing it to customers if no critical or high-severity defects are open, because the system delivers its primary functionalities effectively and meets basic quality standards.
